Dear Reader

1ST AFRICAN PACS & RIS EDU-CONFERENCE : TYGERBERG, 22-24 OCTOBER 2009

It is my pleasure to endorse this Edu-Conference, the first of its kind in Africa.

The aim of this congress is to improve the understanding and increase the knowledge of this very important next step in medical imaging.

PACS/RIS has dramatically improved the way our hospital in general and our Radiology Department in particular operate on a daily basis. This is to a great extent due to the strategic vision and detailed planning that went into defining our requirements as well as the project implementation and meticulous management of all the changes necessary to make this project a success.

This has not been the case in all in the sites in Africa where PACS/RIS has been implemented.

The purpose of this Edu-Conference is to identify the common mistakes and learn from each other to ensure that you successfully navigate your way to an optimized PACS/RIS implementation.

A further objective of this Edu-Conference is to increase the knowledge of your staff and specifically the applied knowledge to the PACS/RIS solution to ensure that, after implementation, the solution remains a finely tuned engine.

We hereby confirm our full support for this event and hope to see it grow from strength to strength.

Kind regards

CHIEF DIRECTOR
